SYED NOORJAHAN

AI Engineer @TCS Digital | GenAI, Agentic AI | Next.js | Nest.js,
Spring Boot | MongoDB, MySQL
Bengaluru, Karnataka, India

Summary

- Software Engineer with around 2 years of professional experience in full stack web development, specializing in both frontend and backend technologies.
- Strong proficiency in JavaScript and TypeScript, used in building scalable and maintainable codebases across multiple production-level applications.
- Hands-on experience with React.js for developing interactive and component-based UIs, implementing reusable components, hooks, and responsive designs using Tailwind CSS and Material UI.
- Worked extensively on Next.js, leveraging server-side rendering (SSR), dynamic routing to improve page performance and SEO.
- Backend development experience with Nest.js and Spring Boot, building RESTful APIs, managing user authentication with OAuth2, and integrating third-party APIs.
- Designed and optimized databases using MongoDB and MySQL, implementing indexing, schema validation, and writing complex queries to handle business logic efficiently.
- Integrated Socket.IO and WebRTC to enable real-time features like video conferencing, live chat, and collaborative task management systems.
- Developed and implemented role-based access control (RBAC) and secure token based authentication flows.
- Used Firebase for authentication, hosting, and real-time database services in personal and client projects.
- Proficient in Agile methodologies, actively participating in sprint planning, stand-ups, and code reviews using Jira, Slack, and Git.
- Experienced in building e-commerce, healthcare, and ATS platforms, with a proven ability to increase product efficiency, engagement, and scalability.
